

Federated, open source, and secure communications with XMPP

Polarian (George Timms) <polarian@polarian.dev>

What is XMPP?

- ▶ eXtensible Messaging and Presence Protocol (XMPP)

What is XMPP?

- ▶ eXtensible Messaging and Presence Protocol (XMPP)
- ▶ Federated protocol to exchange data via XML (No central server)

What is XMPP?

- ▶ eXtensible Messaging and Presence Protocol (XMPP)
- ▶ Federated protocol to exchange data via XML (No central server)
- ▶ Standardised by IETF (RFC 3920 and RFC 3921) since 2004!

What is XMPP?

- ▶ eXtensible Messaging and Presence Protocol (XMPP)
- ▶ Federated protocol to exchange data via XML (No central server)
- ▶ Standardised by IETF (RFC 3920 and RFC 3921) since 2004!
- ▶ Extensible protocol, extensions standardised by XSF

Why use XMPP?

- ▶ Open standard, anyone can implement it without fear of lawsuit

Why use XMPP?

- ▶ Open standard, anyone can implement it without fear of lawsuit
- ▶ Open source, a large amount of XMPP software is FOSS

Why use XMPP?

- ▶ Open standard, anyone can implement it without fear of lawsuit
- ▶ Open source, a large amount of XMPP software is FOSS
- ▶ No vendor lock-in, clients and providers can be swapped out as needed.

Why use XMPP?

- ▶ Open standard, anyone can implement it without fear of lawsuit
- ▶ Open source, a large amount of XMPP software is FOSS
- ▶ No vendor lock-in, clients and providers can be swapped out as needed.
- ▶ Global, no single jurisdiction.

Why use XMPP?

- ▶ Open standard, anyone can implement it without fear of lawsuit
- ▶ Open source, a large amount of XMPP software is FOSS
- ▶ No vendor lock-in, clients and providers can be swapped out as needed.
- ▶ Global, no single jurisdiction.
- ▶ Diverse software and provider ecosystem.

Why use XMPP?

- ▶ Open standard, anyone can implement it without fear of lawsuit
- ▶ Open source, a large amount of XMPP software is FOSS
- ▶ No vendor lock-in, clients and providers can be swapped out as needed.
- ▶ Global, no single jurisdiction.
- ▶ Diverse software and provider ecosystem.
- ▶ Self-hostable, take control of your own messages.

How to get started?

- ▶ Pick a client, some examples:

Android: Conversations (free on play store, fdroid preferred)

iOS: Monal IM (free on App Store)

Windows: Gajim (free on Microsoft store)

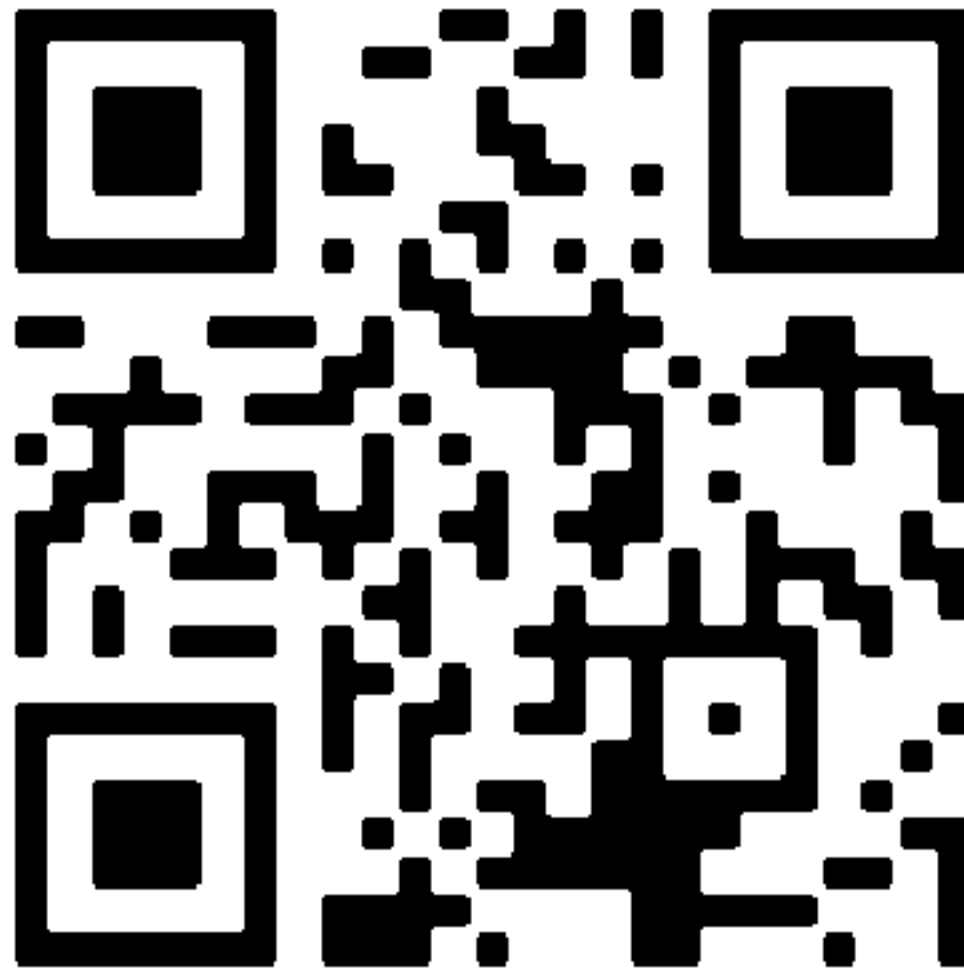

MacOS: Monal IM/Gajim

Linux/BSD: Dino/Gajim

- ▶ Pick a provider

- ▶ Chat!

XMPP Providers

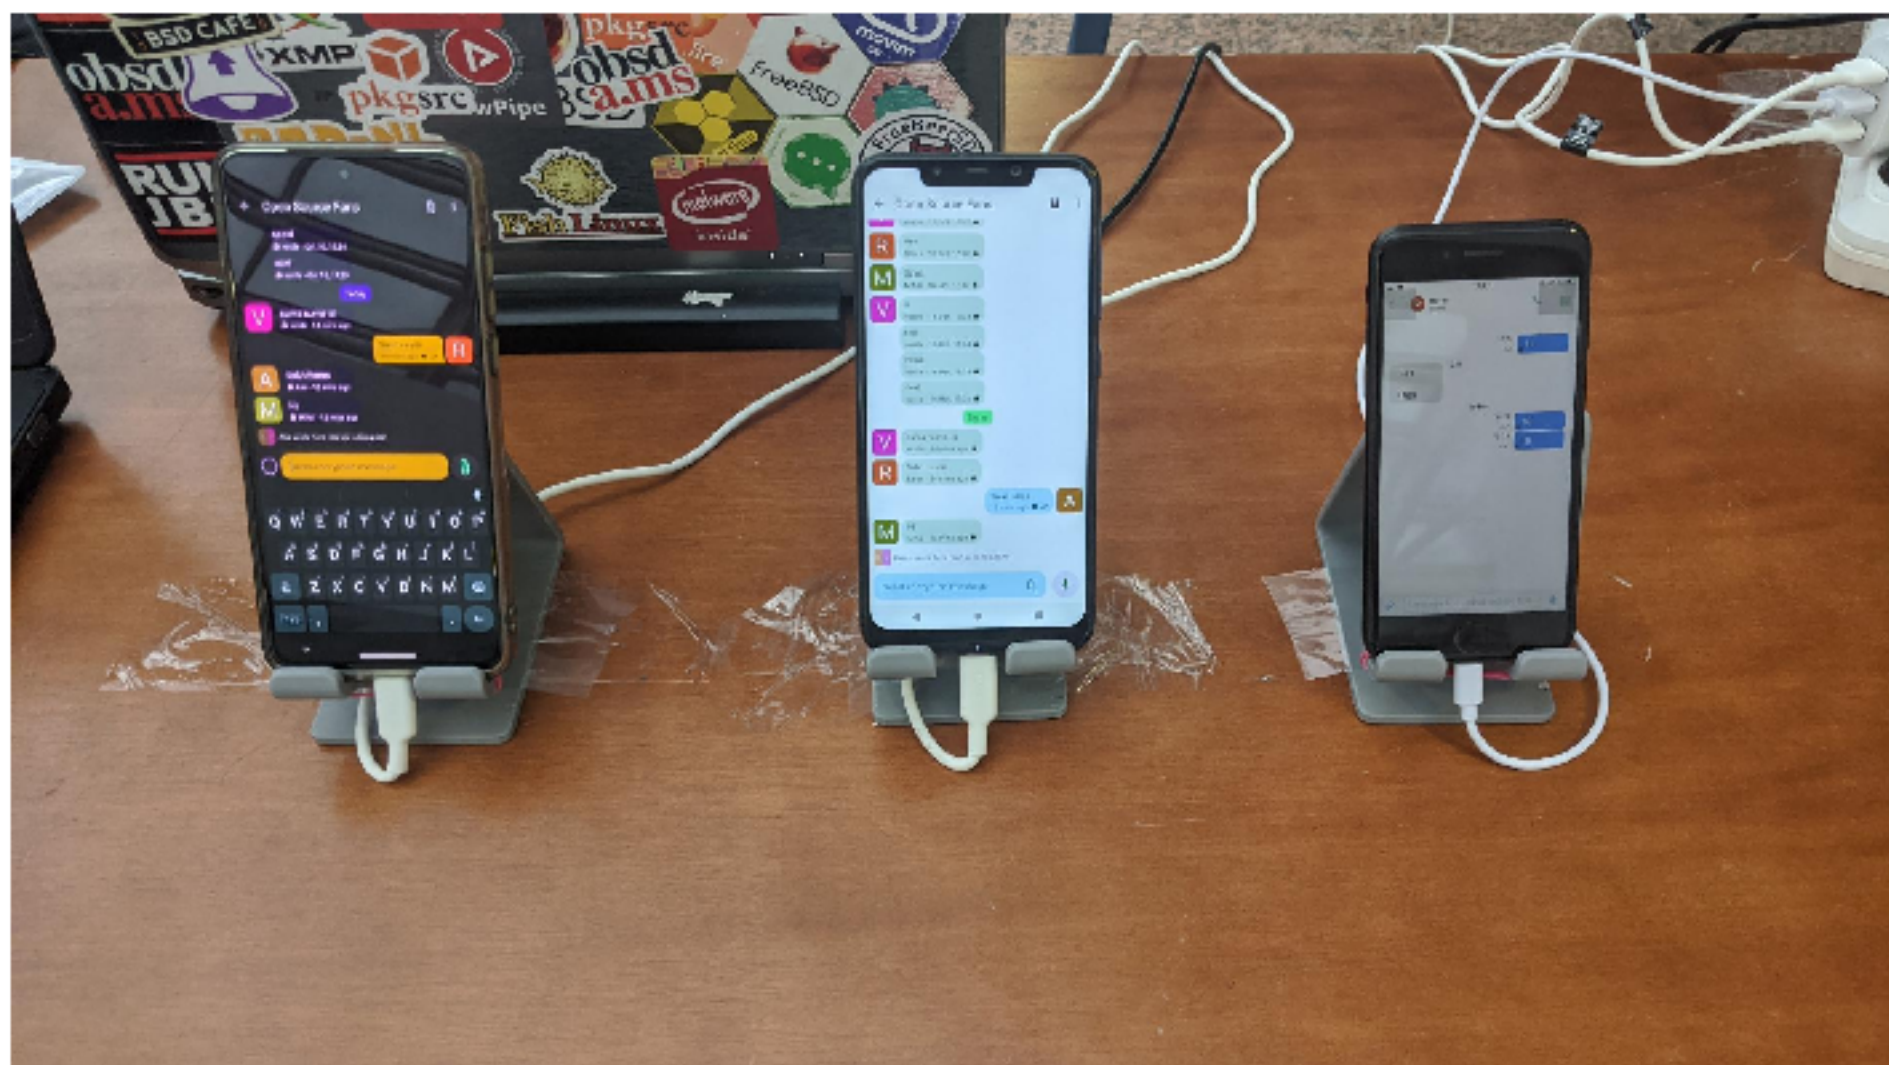

providers.xmpp.net

XMPP at OmniOpenCon

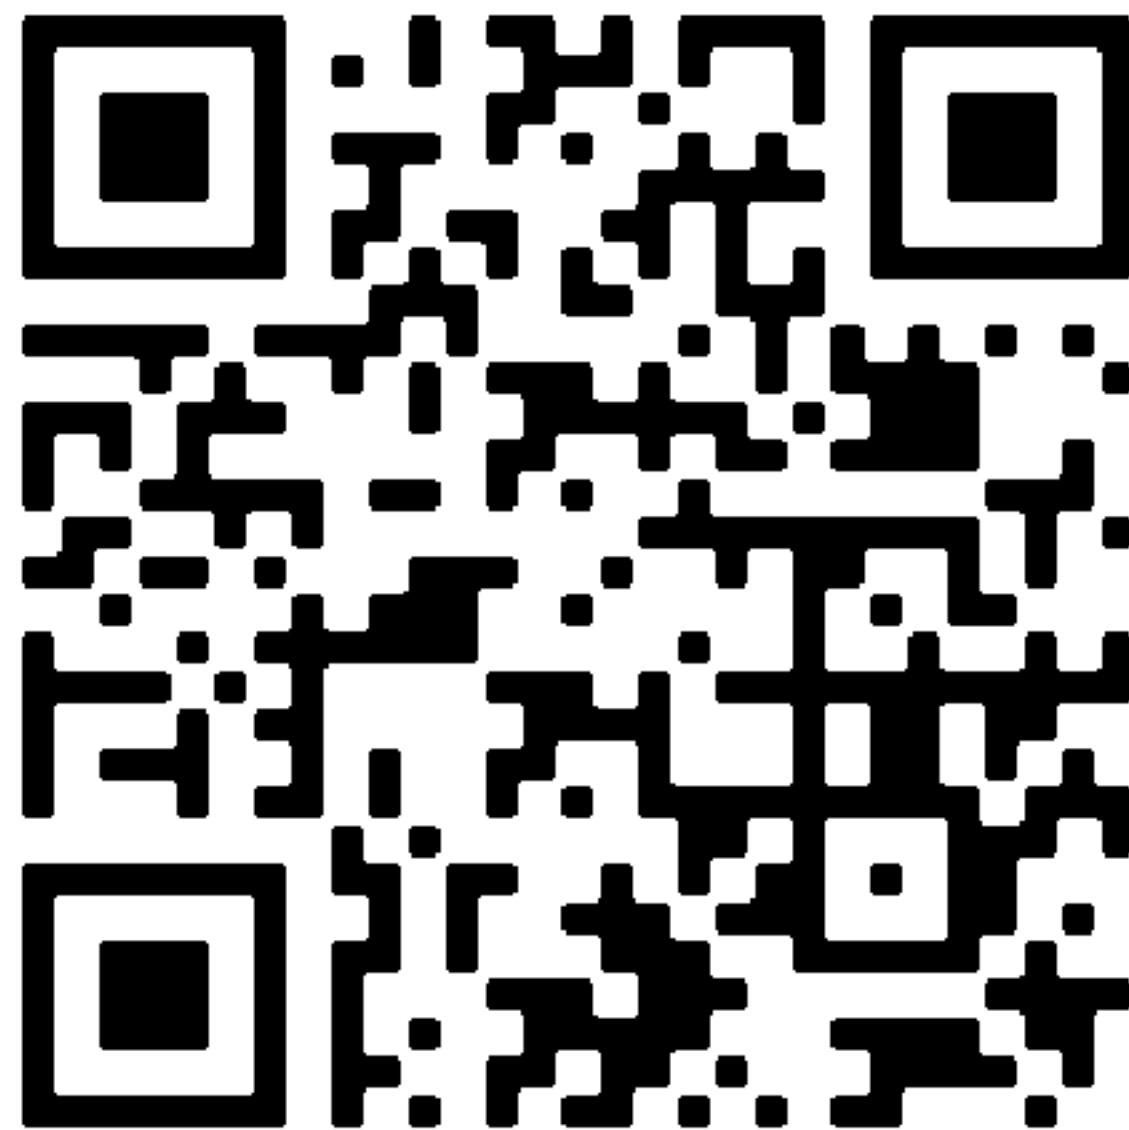

- ▶ Stand: Next to registration desk
- ▶ MUC: omniopencon@muc.mohrie.net

Unofficial OmniOpenCon MUC

omniopencon@muc.mohrie.net

Providers

- ▶ bastos.cc (DE) - Thanks to Edward
- ▶ nucile.ro (RO) - Thanks to Para
- ▶ Both maintained by Romanians!
- ▶ Come to stand for invites!

Sponsors

- ▶ XMPP Standards Foundation (XSF) - Stickers and Leaflets
- ▶ Cheogram - Stickers
- ▶ Monal IM - Stickers

Thanks to

- ▶ Volunteers - Edward, Para, Rares and Nico
- ▶ OmniOpenCon - Hosting our stand
- ▶ XSF - Communications and outreach for the stand/conference

and finally...

Thank you all for attending my talk!
(and the amazing discussions at the stand)
